very good	All good but a little too long 4 hours is a big commitment	n/a	yes	see question #6		1-We have the climate to grow quinoa & Goji berries 2-We have lots of geothermal energy. We should use this to develop year round greenhouses 3- Will there be a summary and action plan taking into consideration all of the information provided today? 4-How can we make it accessible i.e. good food not only for the wealthy 5- Next time instead of 3 days in a row do 3 evenings once a week OR do a full Saturday where people can come and go 6-There was a really good turnout! Congratulations! There's obviously an interest in this community.

excellent	n/a	no	yes	n/a	n/a	One of the best ideas presented, I thought was the 'network' of local producers, similar to Artsnet-with promotion to have more people visiting farms. Just like MacDonalds etc have their marketing and propaganda campaigns. So should organic foods benefits be fed to public consciousness. In conjunction with this 'Organic Farms Net' so should a web platform be developed for farmers and consumers to buy, trade, communicate educate etc...
